

# evRoaming4EU

Realising cross-border charging in Europe

## SAVE THE DATE: NOVEMBER 5 2018

Be part of the solution for  
**Smart and seamless cross-border charging in Europe**

Come to our  
DE Kick-off  
evRoaming4EU

The road to seamless cross-border charging is a bumpy yet exciting one, and you are invited along for the ride! November 5 will be the national kick-off of the European project connecting various pilots and projects in multiple countries.

A great example is the roll-out of the public charging infrastructure in the Free and Hanseatic City of Hamburg. As the gateway between Northern and Central Europe, Hamburg forms an indispensable link to enable cross-border roaming.

*What can you expect on this day?*

- Official DE launch of evRoaming4EU: What is it and how can you get involved?
- The densification of public accessible charging points - Hamburg's path towards a comprehensive EV readiness (Peter Lindlahr)
- Experience, method and results of location determination of e-charging infrastructure in the metropolitan area (Christian Scheler)
- Interaction and networking

More information about the program will be shared soon, but [register now](#) to secure a place.

### ABOUT THE PROJECT

This NKL project is a collaborative partnership between four countries (Denmark, Germany, Austria and the Netherlands) to facilitate roaming services and provide transparent information about charging in Europe through the use of the open indepen-

dent OCPI protocol. Local and international partners, suppliers and EV drivers are welcome to contribute to the project and share knowledge and experiences. The project's ultimate goal is to enable all EV drivers to charge hassle-free anywhere in the

EU. About the project: The German partners of evRoaming4EU are SNH (Stromnetz Hamburg GmbH), CPO of public charging infrastructure of the city of Hamburg and eclearing-net, smartlab innovationsgesellschaft mbH [More about evRoaming4EU](#)
